

# DISPOTILT

TO BE SOLD IN AS IN CONDITION

# DISPOTILT

Rajoo Engineers Ltd. made DISPOTILT Thermoforming machine working with air pressure, in mould punching and rotation of the lower plate.

### Production Specification

- > Production capacity: 71000 cups/hour
- > Cycle Speed: 36 cycles/min
- > Weight of the cup: 1.5gm to 1.6gm
- > Forming area: 700mm x 400mm
- > Mould forming depth: 150mm
- > Servo assisted plug assist unit
- > Automatic lubrication system
- > Sheet indexing system with toothed chains driven by servo motor
- > Control cabinet with Omron PLC controlling
- > Cam operated system
- > Becker brand vacuum pump
- > TFT colour touch screen
- > Coil feed unit with 500kg maximum capacity

**Stacking solutions for low weight articles, an integrated thermoforming, stacking, counting and bag wrapping solution.**

### Mould Specification

- > Mould made of aluminium with a hardness from 179 - 180
- > Accelerated four fold upper cutting cooling system
- > Dia 71mm - 32 no. cavity mould (including 1 set of inserts, ejectors and plugs)
- > Dia 80mm - 21 no. cavity mould (including 1 set of inserts, ejectors and plugs)
- > Extra inserts for both the moulds available

### Stacker Specification

- > 50mm - 100mm packaging
- > Untouched loading into conveyors
- > Printed wrapping option with colour sensor
- > Suitable for counting of 50pcs/100pcs possible.
